.PNG	Portable Network Graphics (PNG) is a graphics (picture) file format that supports lossless data compression. PNG was designed for transferring images on the internet.
Cache	A component that stores data so future requests for that data can be served faster; the data stored in a cache might be the result of an earlier computation, or the duplicate of data stored elsewhere.
Exif Data	Exchangeable image file format (Exif) is a standard that specifies the formats for images, sound and metadata tags used by digital cameras (including smartphones). The metadata tags can include date/time information, camera make, model and settings, GPS data, a thumbnail for previewing the picture, and other information.
Magnet Axiom	This is a Canadian company which has developed a digital forensics platform for acquisition, analysis of computers, cell phones and digital devices. This software tool is used by law enforcement around the world.
MD5	The MD5 algorithm is a widely used hash function providing a 128-bit hash value. It can be used to ensure that a transferred file has arrived intact.
Thumbnail	Thumbnails are reduced size versions of image / video files and certain document types; often stored in the Thumbnail Cache file. Its purpose is to speed up folder load times and to reduce bandwidth and download time.
UTC	Coordinated Universal Time (UTC) is the primary time standard by which the world regulates clocks and time. For most purposes, UTC is synonymous with Greenwich Mean Time (GMT). Computer servers, online services and other entities that rely on having a universally accepted time use UTC as it is more specific than GMT. Time zones around the world are expressed as positive or negative offsets from UTC. UTC does not change with a change of seasons, but local time may change if a time zone jurisdiction observes daylight saving time. For example, local time on the west coast of Canada is eight hours behind UTC (UTC -8) during winter (Pacific Standard Time (PST)), but seven hours behind (UTC -7) while daylight saving is observed (Pacific Daylight Time(PDT)). PST changes to PDT at 02:00 hrs local time on the second Sunday in March (springs forward one hour), and returns to PST on the first Sunday of November (falls back one hour).
X-Ways Forensics	This is a German Company that makes software for Computer Forensics, Data Recovery and IT Security. It is used by law enforcement and the private sector around the world.
